The imposing Baroque church also boasts beautiful frescoes. Walk through the village, see the exhibition of paintings scattered among the houses, visit the artisan shops, the olive bar, the wine bar with more than 200 different wines or providers of local delicacies, feel the pulse of Brda life and discover how the village has preserved or changed its image over time.

## 8 Visit a church

In Brda, church bells toll in almost every village, and in a handful of villages there are even two churches, but there are also villages without churches. Each church is unique, whether for its altar, its vaults, its murals or its views of the Brda countryside or across the Friulian plain. Many of them speak of an interesting legend, custom or the signature of a well-known Slovenian artist. Some even have interesting archaeological finds. ## 10 Kotline and Krčnik

Step into the middle of the forest, where one of the few stone bridges, carved into the rock over millions of years by gurgling water, rises above the stream. The Kozbanjšček has carved out an extraordinarily picturesque gorge called Krčnik. The latter is around 40 metres long and up to 6 metres wide and 6 metres deep. The most unusual is the first, vast pothole. Around the middle of the basin, a natural bridge splits, beautifully rounded and smooth, created by the running water from the grinding process. Krčnik is a natural attraction, one of the most beautiful of its kind in Slovenia, which is protected as a cultural monument and will enchant you in all seasons. In summer, you can cool off in the Kotline gorge, which was also hollowed out by the torrential Kozbanjšček stream a little lower down from Krčnik.

## 11 Korada Hill

Here, the landscape climbs to the highest peak, Korada, 812 m high. The locals below the hill call it Kobalar, after the farm Pri Kobalarju. Just below the summit are the Church of Saint Gendrica and a mountain hut, built on the foundations of military buildings from the First World War. Today, you can still admire the many meadow plants that are almost non-existent elsewhere in Brda. Mountain trails lead to Korada from the centre of Brda, the Soča Valley and Sabotin. Along the way, you can also see traces of the First World War. The vegetation here is not as diverse as on Sabotin. A popular excursion point for many hikers and mountaineers, it offers spectacular views from the mountains to the sea.
